Rejuvapen – Microneedling

Micro needling is also known as skin needling or collagen induction therapy and is the use of microneedles to create controlled microscopic needle incisions in the stratum corneum.

HOW DOES IT WORK?

The idea is based on the skin's ability to repair itself whenever it encounters physical damage. In this case, thousands of micro wounds are created in the skin by highly precise, sterile needles. Immediately after the injury occurs the skin disperses old damaged connective tissue and replaces it with the new. Rejuvapen micro needling allows for controlled induction of the skin's self-repair mechanism by creating micro "injuries" in the skin which triggers new collagen synthesis yet does not pose the risk of permanent scarring. The result is smoother, firmer and younger looking skin and fainter scars/stretchmarks.

WHO WILL BENEFIT?

People concerned about fine lines, wrinkles, scarring including acne scarring and mild vascular rosacea. Clients who undergo a course of treatment report a 60%-80% improvement in their skin.

WHAT HAPPENS DURING THE TREATMENT?

Prior to any treatment a full consultation with your therapist will take place to determine your suitability, needs and expectations. The whole treatment takes around 45-60 minutes plus additional time for topical anesthetic which is used to numb the skin and ensures you are comfortable during the treatment.

After your skin is numbed the therapist will gently move the Rejuvapen over your skin to puncture the epidermis layers of the skin and create minute sub-cutaneous injuries. These microscopic wounds close within 3-5 minutes, but that's enough to stimulate new collagen deposition which may last for up to a year. You may experience some slight discomfort, particularly around the sensitive areas of your face such as around the eyes and nose.

WHAT IS INCLUDED IN THE TREATMENT?

The treatment will commence with a thorough consultation and application of topical anesthetic which takes approximately 35 minutes to work. The therapist will then remove all the traces of anesthetic from the skin. Your therapist will then commence Rejuvapen treatment over your skin targeting all your concerns. A hydrating and repairing serum and cream will then be applied followed by a protective Sun cream.

HOW MANY TREATMENTS SHOULD I HAVE?

Each client is different and so are their needs so each micro needling course is different. Treatments should be once every 6 weeks for 4-6 months. You can expect to continue seeing results for up to 6-8 months after the last treatment as your skin's matrix regrows new collagen.

WHAT ARE THE SIDE EFFECTS?

After the treatment your skin will show signs of redness and will appear similar to mild sunburn and there may be some slight swelling. This will begin to subside between 24-48 hours after treatment. During the first 3 days you will experience some tightness, dryness and mild sensitivity to touch in some areas.

WHAT AFTERCARE WILL I NEED TO FOLLOW?

Your therapist will advise you of a rescue skincare routine to help soothe and protect the skin and enhance the results. We also recommend use of a sun cream every day. We advise you not to wear makeup for 2-3 days.

BIOTEC

ELEMIS BIOTEC delivers 7 new highly-effective, super-charged facial treatments to re-boot cellular performance, enhancing the skin's ability to repair, renew and re-tone.

Revealing a new generation of facials, each treatment targets specific skin needs to deliver immediate, visible, long-lasting results. The skin's unique bio-chemistry is constantly compromised. Lifestyle, sunlight, stress, age, illness and medication cause a breakdown in cellular energy and communication, resulting in a weakened skin structure, stressed and unbalanced skin. Unresponsive cells need new stimuli to help re-boot cellular performance and re-establish effective cell communication, enhancing the skin's ability to repair, renew and re-tone.

After in-depth studies and research, ELEMIS found that combining a unique synergy of 3 targeted stimuli – touch, technology and activates – it was possible to deliver immediate, visible and longer-lasting results.
